VX 820 Duet Wired Terminal

Make the checkout process fast, secure and reliable.

Electronic payment methods are evolving fast. You need a point of sale system that keeps the line moving, protects customer data, and can handle all types of payment, including contactless, chip and magnetic swipe transactions. The VX 820 Duet all-in-one countertop payment solution will help you keep pace with changing payment types and ensure a speedy checkout process.

The VX 820 Duet is an affordable solution that takes just a few minutes to setup. The terminal processes transactions quickly using a traditional telephone line or over the Internet (IP) with telephone backup. With dual-user functionality staff and customers alike will appreciate the ease-of-use, speed of processing and built-in security.
